"I reached out to Varun to get ideas on coming up with a sales process that would help continue my sales success. My success up to this point were a combination of working the accounts and luck. But I wanted to come up with a proven process. Varun's help was invaluable. From the very beginning he helped me establish what true success looked like. I am happy to say that the strategy that he helped me with are strategic, logical and has proven to be a key to my continued success in this second quarter so far. I am now selling with data of what has worked. I then use this data to adjust as needed to increase sales. I am looking forward to working with him again."
